

PRONTO-Xi

Warehouse Management System

As the heart of your supply chain, your warehouse has a mandate to handle stock accurately and efficiently. It is so critical to your operations that often small improvements in warehouse optimization significantly impact your bottom line.

PRONTO-Xi Warehouse Management System (WMS) fully integrates within the PRONTO-Xi ERP suite to fine tune your warehouse and deliver optimum performance.

With the WMS you can reduce labor costs, minimize inventory, increase productivity, optimize space utilisation, improve customer service and increase operational control.

Quick ROI

The returns on the PRONTO-Xi WMS are immediate, significant and measurable. Reduced inventory holdings increase your cash position. Efficient handling reduces order to delivery cycle time. Rapid and accurate order fulfilment means less invoice claims leading to shorter settlement periods. Comprehensive visibility aids decision making and enables you to eliminate non value adding tasks.

Improved Warehouse Layout and Space Utilisation

PRONTO-Xi WMS supports a three dimensional schema to match your row, aisle and bay warehouse layout. You have visibility of all locations allowing you to easily find and quantify inventory held. User defined location types, flexible storage design, and the ability to set up fixed and floating bins makes it easy to manage and optimize your warehouse space.

Depending on your operational requirements, WMS offers you the ability to manage multiple warehouses in the one location. For example, you can manage the warehouse operation of different companies with different product ranges within a single warehouse by using your WMS to distinguish between the multiple warehouses. You can also configure and rank multiple zones within the one warehouse if you need to cater for different types of product, such as high security or cold storage. You have total control of your warehouse layout and the ability to maximize space utilization.

Key Benefits

- ◆ Maximize staff productivity
- ◆ Reduce staff training overhead via directed pick and pack
- ◆ Reduce expensive and error prone paper-based processes
- ◆ Get accurate real-time view of your inventory
- ◆ Optimize warehouse space
- ◆ Exceed customer expectations
- ◆ Track and trace your inventory
- ◆ Eliminate waste

“Pronto provides tools to be able to manage and track our stock better, which has subsequently reduced our inventory level and boosted our stock integrity. Our service delivery to customers has improved because we are managing and replenishing our stock more efficiently.”

Jonathan Gabriel, Chief Financial Officer, Croxley Stationery Limited

Technology

- ◆ WMS is a fully integrated module of PRONTO-Xi Enterprise Management System
- ◆ Seamless integration with other PRONTO-Xi modules:
 - ◆ Financials
 - ◆ Distribution
 - ◆ Scanpack
 - ◆ RF
 - ◆ Manufacturing
 - ◆ Retail

Improved Performance and Flexibility

PRONTO-Xi WMS allows you to implement performance enhancement tools throughout your warehouse. For example, by introducing RF (radio frequency) to your picking process, and then scanning products throughout the warehouse, you can completely automate your facilities and eliminate manual processing. Implementing a paperless warehouse operation dramatically improves information flow within PRONTO-Xi, effectively tracking your goods by automatically capturing serial numbers when goods arrive or leave your warehouse, and reducing your labor costs by increasing your productivity.

The ability to receive Incoming shipment information electronically and then directly scan from a universal SSCC label into PRONTO-Xi WMS enables the automation of your incoming goods area. Automatic receipting and putaway negate the need for manual data entry, lowering your inwards goods processing cycle and making stock available for sale much faster.

Establishing optimized picking paths allows you to productively utilize your labor force by having complete control of the physical workflow throughout the warehouse. The ability to specify picking parameters with minimum and maximum picking quantities for each location and set up an unlimited number of storage locations means your warehouse staff are always sent to the correct location.

...so easy to work with™

PRONTO-Xi WMS is the ideal solution to optimise your warehouse operations. Not only is it fully integrated with the rest of PRONTO-Xi, including EDI transactions such as the Incoming ASN capability, but WMS delivers tangible and immediate cost benefits. It improves stock movement accuracy, reduces cycle times in the warehouse and exposes critical inventory information. At every level, PRONTO-Xi WMS is so easy to work with.

About Business Computer Technologies, Inc. (BCT)

Business Computer Technologies, Inc. (BCT) has been a premier provider of CRM/ERP solutions since 1984 and is recognized as a leading software solutions company throughout North America.
